

HARDIK KHARE | 70765344

HW 2.1 (25 points)

Write *strstr(string needle, string haystack)* that returns the index of the starting character of the first occurrence of needle in the haystack, or -1 if the needle does not exist in the haystack.

Section 1: Successful compilation of program

```
hkhare@circinus-27:~/hw2
$ cat APHW2Q1.java
import java.util.*;

class APHW2Q1{

    public static String[] takeInput(){
        Scanner sc = new Scanner(System.in);
        System.out.println("Enter needle");
        String needle = sc.nextLine();
        System.out.println("Enter haystack");
        String hay = sc.nextLine();
        return new String[]{needle, hay};
    }

    public static int findNeedleInHay(String needle, String hay) {
        for(int i=0;i<=hay.length()-needle.length();i++){
            if(hay.charAt(i)==needle.charAt(0)){
                int j=0;
                for(;j<needle.length();j++){
                    if(hay.charAt(i+j)!=needle.charAt(j))
                        break;
                    if(j==needle.length())
                        return i;
                }
            }
        }
        return -1;
    }

    public static void main(String args[]){
        String[] input = takeInput();
        System.out.println("Needle at Index: "+findNeedleInHay(input[0],
input[1]));
    }
}
hkhare@circinus-27 02:10:32 ~/hw2
$ javac -Xlint APHW2Q1.java
hkhare@circinus-27 02:11:58 ~/hw2
```

Section 2: program running on *the provided example from the assignment*

```
hkhare@circinus-27 02:00:03 ~/hw2
$ java APHW2Q1
Enter needle
chem
Enter haystack
alchemy
Needle at Index: 2
```

```
hkhare@circinus-27 02:00:34 ~/hw2
$ java APHW2Q1
Enter needle
chem
Enter haystack
heartache
Needle at Index: -1
```

Section 3: Edge Case #1

Description: Both needle and Haystack are empty

Input:

Needle ""

Haystack ""

Expected output: -1

```
hkhare@circinus-27 02:59:46 ~/hw2
$ java APHW2Q1
Enter needle

Enter haystack

Needle at Index: -1
hkhare@circinus-27 02:59:52 ~/hw2
$
```

Section 4: Edge Case #2

Description: Both needle and Haystack are equal

Input:

Needle "laptop"

Haystack "laptop"

Expected output: 0

```
hkhare@circinus-27 02:59:52 ~/hw2
$ java APHW2Q1
Enter needle
laptop
Enter haystack
laptop
Needle at Index: 0
hkhare@circinus-27 03:05:15 ~/hw2
$
```

Section 5: Edge Case #3

Description: Needle is longer than haystack

Input:

Needle "bustop"

Haystack "bus"

Expected output: -1

```
laptop
Needle at Index: 0
hkhare@circinus-27 03:05:15 ~/hw2
$ java APHW2Q1
Enter needle
bustop
Enter haystack
bus
Needle at Index: -1
hkhare@circinus-27 03:06:51 ~/hw2
$
```

HW 2.4 (25 points)

Write *strstrx(string needle, string haystack)* from problem 1 above but use one of the faster algorithms: Boyer Moore, Rabin Karp, or Knuth-Morris-Pratt.

Section 1: Successful compilation of program

```
hkhare@circinus-27:~/hw2
hkhare@circinus-27 03:14:46 ~/hw2
$ cat APHW2Q4.java
import java.util.*;
